PHOTOVOLTAIC PLANTS SCADA PORTFOLIO

COMMITTED TO THE PRESENT AND THE FUTURE OF THE SUSTAINABLE ENERGY

At Aseprel we develop our activity in the field of computerized management and energy since 1995.

Aseprel, formed by a team of professionals, guarantee reliability and security in all processes and services, covering all the needs of a monitoring SCADA.

Our supervision system SCADA, allows us to offer you an optimal and efficient energy management adapted to your needs.

Our projects are located in a variety of countries. we collaborate in the maintenance of facilities at global level, implementing the technologies with the greatest potential.

INTERNATIONAL PROJECTS

**+900 MW MONITORED
+30 PROJECTS DISTRIBUTED
GLOBALLY**

SCADA

Process supervision and energy management system with a customizable and scalable software platform.

- CUSTOM SOLUTIONS

- INTUITIVE INTERFACE

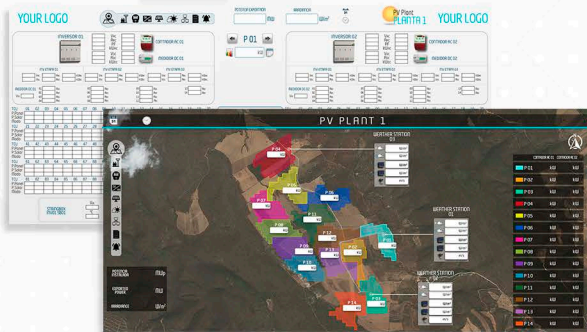

- REMOTE CONTROL SOLUTIONS

A SCADA SOLUTION

Our scada solution is an essential tool to optimize the maintenance and management of the processes of a solar plant.

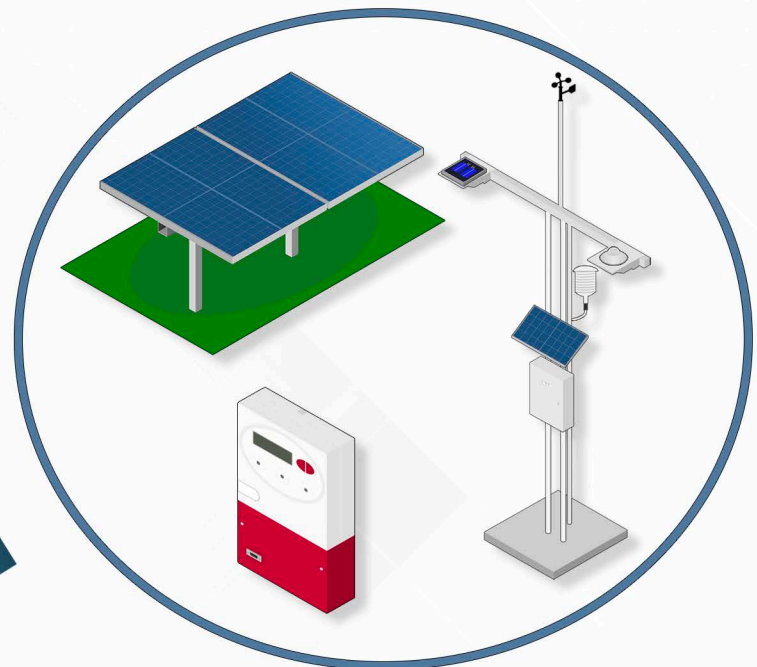

Allows you to keep track of:

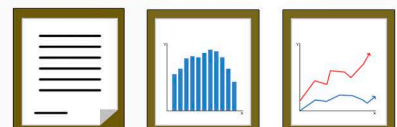

Dc/Ac Measurements, inverters, weather stations, trackers, substation...

Allows the monitoring of any device on the market with modbus communications.

**MONITORING
SYSTEM**

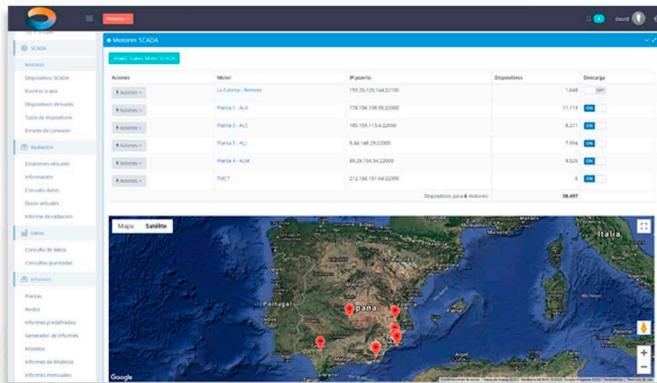

**REPORTS,
GRAPHS & TABLES**

REPORTING PLATFORM

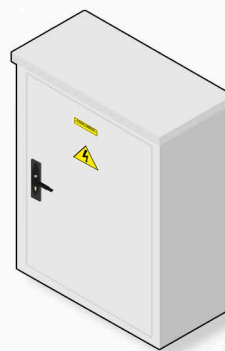

Modular proprietary development tool with the ability to:

- Parameterizable reports.
- Weather forecast.
- Management of O&M tickets.
- User management.

MAIN SERVICES

- SCADA Software for solar plants and industry.
- Custom communication rack.
- Communication and measurement boards.
- Billing measurement boards.
- Supply of weather stations.

OTHER SERVICES

- Fiber optic fusion and certification.
- Communications wiring connectorization.
- PPC supply.

NATIONAL PROJECTS

+1000 MW MONITORED
+40 PROJECTS DISTRIBUTED
NATIONALLY
